

CONCEPT EVENT ELEMENTS MOLECULAR MIXOLOGY

WOW YOUR GUESTS WITH OUR BARTENDING!

**INDULGE INTO THE MAGICAL WORLD OF
MOLECULAR MIXOLOGY.**

A unique method of mixing beverages is known as molecular mixology, which makes use of scientific analysis and methods to comprehend and experiment with cocktail ingredients on a molecular level

SMOKE COCKTAILS

*Ignite awe with a blazing fire !
Although it's undoubtedly Instagram-worthy, the effect of smoked drinks is far more than just presentation. All things considered, smoking enhances the multi-sensory experience of a cocktail. You can accomplish this at home with the correct tools and a few safety precautions (because you are dealing with fire and alcohol, after all). To produce rich and smoky whisky cocktails, use these expert suggestions.*

FOAM COCKTAILS

Beer, cocktails, or even soda without foam on top are uninteresting, as any reputable drink aficionado will tell you. It goes without saying that you won't refuse it, but it is disappointing when the barman delivers you a drink without any foam. Although the flavour may be present, it is the velvety, fluffy cream texture that elevates a drink to the rich category.

FIRE COCKTAILS

Anyone in the vicinity will be drawn in by the spectacle of a flamed drink, whether the technique is used solely for aesthetics or to give a cocktail a gentle warmth or caramelised aromas.- Experience our unique and unforgettable fire-inspired cocktails that will set your night ablaze.

CAVIAR SHOTS & COCKTAILS

If you enjoy Caviar's bursting roe and love alcohol's delightful taste, you'll adore our molecular formula. It's a fantastic product that combines the best of both worlds. The novel feature of Caviar cocktails is that you can serve them as crowd-pleasing aperitifs and avant-garde shots for your guests.

FLYING HELIUM AIR COCKTAILS

These clouds, comprised of delicate helium-filled bubbles, possess an endless array of flavors and scents. Furthermore, they have the remarkable ability to take on various shapes, from simple discs to imaginative and intricate forms, all while gracefully ascending into the sky.

JELLO SHOOTERS

Jello shooters have always been the life of the party! They are the ideal complement to the molecular concept and are ideal for a wide variety of social functions. These colourful, jiggly treats are a favourite among both young and old, bringing a fun and playful element to any celebration. Made by mixing flavoured gelatin with alcohol, Jello shooters offer a delightful twist on traditional gelatin desserts.

FLAVOURED AIR COCKTAILS

A collection of unique and refreshing drinks that will take your taste buds on a delightful journey. Flavoured Air Cocktails are carefully crafted with a blend of flavours to create a memorable drinking experience.

FLAVORED SMOKED BUBBLE COCKTAILS

Visually stunning and delectable creations combine the artistry of mixology with the excitement of molecular gastronomy. Delicate, flavoured bubbles infused with aromatic smoke will elevate your cocktail game and delight your senses.

CLARIFIED COCKTAILS

A drink that not only looks like a work of art but also tastes like pure perfection where clarity meets craftsmanship for a truly extraordinary drinking experience. Clarified Cocktails are a feast for the eyes, making them an excellent choice for every occasion.
